

# Window Cleaning

## Required Supplies & Equipment:

- Window Cleaning Detergent
- Window Brush or Strip Washer
- Window Cleaner's Bucket
- Chamois
- Squeegee
- Scraper
- Clean Wipers or Rags

**Window Cleaning Purpose:** To provide clean, translucent windows.

**1. Preparation** - Assemble all necessary supplies and take them to windows to be washed.

**2. Window Cleaning** - Mix window cleaning solution in the bucket.

Apply solution to the window evenly with a window brush or strip washer; be sure to cover the area completely.

Start to squeegee the window by placing the squeegee at the top and glide the squeegee to the corner of the window. Glide the squeegee downward to the corner of the window. Use a consistent, even pressure on the squeegee all the way down to the bottom corner of the window.

Wipe off the squeegee with a rag or chamois and begin at the top of the window again. Slant the squeegee downward on the dry, clean side of the glass. Continue all the way down the glass to the bottom of the window. Repeat this until the window is cleaned completely.

When you finish the window, wipe the sills clean and dry with wipers or rags.

**3. Clean Up** - Wash out the bucket and dry it. Wash out chamois with clean water and hang up to air dry. Wash rags. Rinse squeegees and wipe them dry. Store squeegees in a cool, dry place. Do not store squeegees on their blades.

Wash hands after performing these cleaning duties.
